

# Security Education Training & Awareness (SETA) Program for MeCo

Created by Liz Hinz for CSD370-A339

# Sources for Setting up a SETA

- Article by Eric Dosal on Compuquip
- Article by Sarah Sletzinger on Educause

# Compuquip Article Description

- Almost half of breaches caused by human error
- Training employees through SETA program can help
- Defined goals help track progress
- Tailor the program to employees

# Summary of Steps on Compuquip

1. Define your Network Security Education Goals
2. Assess your Audience
3. Develop SETA Program Topics Based on Critical Issues
4. Consider How You'll Distribute Security Education to Current & Future Employees

# Educause Article Description

- Choose a topic & audience for the program
- Evaluate employee's current knowledge
- Organize workshops for the topic & set goals
- Create an education program based on workshops
- Coordinate with departments & be flexible

# Summary of Steps on Educause

1. Determine a Topic & Audience
2. Determine a Baseline
3. Hold Education Planning Workshops
4. Develop the Education Program
5. Implement the Education Program

# Which is the Recommended Source?

- Both sources provide helpful information
- Compuquip is preferred
  - Easier to implement
  - Still covers the requirements of a SETA program

Thanks for viewing!
